School Holiday Workshops for K - 6 Children with bright enquiring minds

14th & 15th April 2009 from 9.30am to 3.00pm each day

The goal of these workshops is to encourage the children
to explore ideas and challenge themselves by

“thinking outside the square”
developing friendships
thinking strategies,
trying new things
brainstorming,
experimentation and sharing
taking intellectual and creative risks
developing ideas through discussion,
sharing and working with other like minded souls

at Lindfield Public School and Peakhurst Public School

Workshop topics: *Full descriptions of the courses on pages 3 of flyer or on website (in alphabetical order)*

PEAKHURST PUBLIC SCHOOL
Bonds Rd

LINDFIELD PUBLIC SCHOOL
cnr Grosvenor & Pacific Hwy

TUESDAY 14TH APRIL

MAGIC OR SCIENCE	K-2
NATURES NURTURE	Y1-3
TIME TO PLAY	Y3-6
MESSY MOLECULES & SUBMARINE SCIENCE	Y2-5
PHYSICS OF FLIGHT	Y2-6
HISTORY	Y3-6

WEDNESDAY 15TH APRIL

JUNIOR ENGINEERS	K-2
GROSSOLOGY	Y2-5
PHYSICS OF FLIGHT	Y2-6
TIME TO PLAY	Y3-6
HISTORY	Y3-6
POET-TREE	Y4-6

REGISTRATION FORM

Please complete a separate form for each child.

	<i>FULL PRICE</i>	<i>DISCOUNT RATE**</i>
COST FOR EACH COURSE:	\$95.00	\$85.00
EARLY BIRD RATE:	\$85.00	\$75.00

****DISCOUNT RATE FOR families booking more than 1 workshop, for members of NSWAGTC or Students at Lindfield, Peakhurst Public Schools**

EARLY BIRD APPLICATIONS CLOSE: 20th March 09

**BOOK EARLY TO GUARANTEE A PLACE
BOOKINGS ESSENTIAL**

Workshops are allocated in order of application and receipt of registration fee.
For emailed applications an email confirming receipt will be sent but **you will not hear from us regarding placement in a course until early bird applications close on 20th March**
Confirmations will be emailed by 25.03.09
The confirmation email will tell you what workshop/s you have been accepted into & include further information on what to bring.

NOTE: Some courses may be cancelled if sufficient numbers are not received by 20th March 09. You can send an email to enquire about course availability after this date or check the web site regarding vacancies.

Follow the prompts from BUYER PAY NOW.

Recipient email address as gtenrichment@australiangiftedsupport.com

Cancellation fee: 50% of fee if place cannot be filled. No refund available if cancelled during final week before workshop.

Send registration and confirmation of payment to: gtenrichment@australiangiftedsupport.com
or FAX: (02) 9620 4837

WORKSHOPS TOPICS

GROSSOLOGY

Presenter **Diane Kersting-Nevery**

Rude noises, bad smells and fascinating visuals will be our focus in this messy hands-on session. You'll make an eyeball model, create friendly faux vomit and design a fearsome fart maker. Learn about blood types and the transfusion recipe for life or death. Concocting inorganic snot slime, pimples and wound pus is likely to inspire you to see the beauty behind stinky feet, bad breath and ear wax. Students take home models, noises, smells and lots of fun facts. ©

HISTORY

Presenter **Maria Bousnakis**

Explore the mysteries of Ancient Assyrians, the Ancient Romans, Greeks and Egyptians through their drawings and sculptures. Uncover the mysteries of the past through the magic of art. Discover the artwork of an unknown civilization created by YOU! This one day workshop will explore the techniques used by ancient cultures and the environments that influenced their artwork.

JUNIOR ENGINEER

Presenter **Mad Lab**

Experiment with magnets, motors, bridges and loads more! Learn the fun of physics and make your own science gadgets to take home.

MAGIC OR SCIENCE

Presenter **Cindy Gordon**

Experiments are not just for scientists; we can do them too!

Today we will put science to work using every day materials. Some of the experiments may seem like magic, but they are based on scientific principles. Learn a few tricks to impress your family or friends.

MESSY MOLECULES & SUBMARINE SCIENCE

Presenter **Dianne Kersting-Nevery**

Manipulate messy molecules and discover the fun world of polymer science! Create colourful chemical reactions before packing viscous fluids into containers that burp and fart to show friends and family. Estimate and measure what can be absorbed by amazing polyacrylates and grow surprising plants on top of this very clever synthetic. Shoot torpedoes through the depths of your own underwater world. Bring your submarine to the surface and lower it as you experiment with strategies to control buoyancy. Discover creative ways to harness the forces of hydropower and atmospheric pressure. Students should be prepared to get wet. ©

NATURES NURTURE

Presenter **Adam Selinger**

Nature is a wonder. In this workshop we explore both everyday nature (e.g. air & water, animals & plants) and extreme nature (e.g. volcanoes & tornados). We will make wind things, gooey stuff, a bottled planet, and extract DNA from fruit.

PHYSICS OF FLIGHT-NOT ROCKET SCIENCE

Presenter **Conor Merrigan**

Learn about flight by making your own flying machines from everyday materials. Discover how the adjustments you make to your flying machines affect the way they fly. By the end of the day you will have learned how to control your flyer even after you have launched it! Come and have a fun day full of flying things

POET- TREE

Presented **Kim Usher**

Ready to climb the branches of a poetry wonderland? In this workshop we will experiment with contemporary forms of poetry & prose to assist you in creating your own unique style of writing! We will explore the development of imagery through the use of poetic techniques & discover ways to transform the pictures in your mind into the words on your page – or the poems in your poet's tree! Bring any poetry you've written in the past & would like to share with the workshop, & be ready to branch out.

TIME TO PLAY

Presenter **Georgia Huxley**

Games have been a part of children's lives forever. Imaginative play and structured play. Come along and play different games from different countries and times in history. We will create our own unique game that can be shared with family and friends.
